

Thank You Round Lake Campers for the Science Lab in Azua Dominican Republic

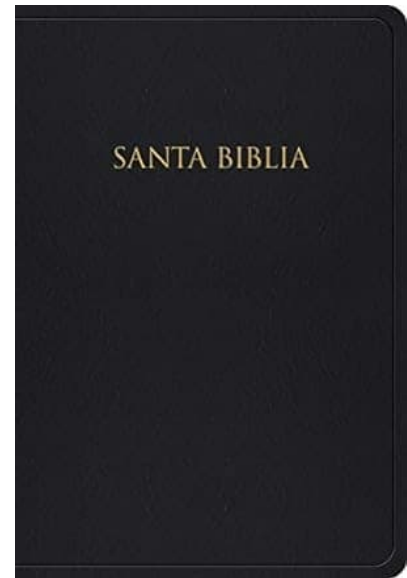

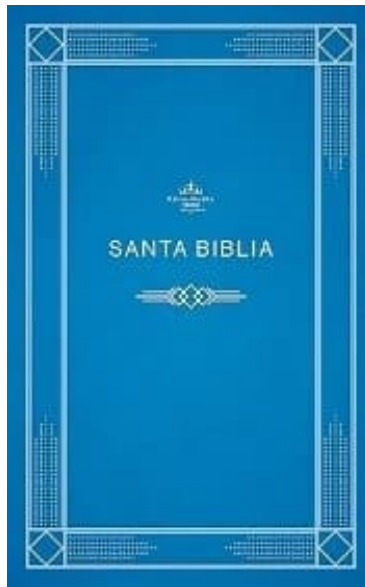

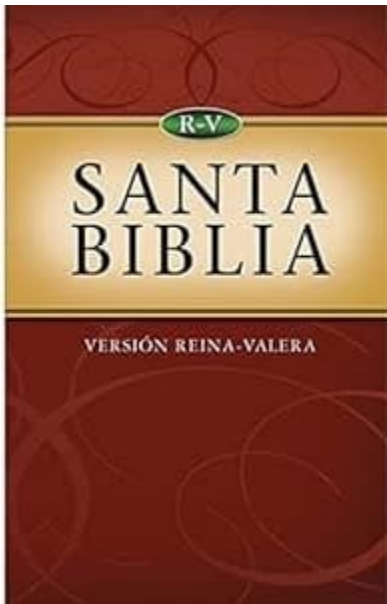

New school and Church plant

Mission for 2025 is Hands for Hope in partnership with Pastor Raul Aquino Peguero in Azua, Dominican Republic. Raul is a Pastor of Iglesia Cristiana de la Comunidad in Azua Dominican Republic. He and his wife run a Christian school in Azua and have begun a new school in a very needy location in Azua. This school will give students the opportunity to learn in an area where there is not a school, and many children may go without education.

Last year-Round Lake Campers supported the building of a science lab and that has enhanced education for the students this year in Azua. They are very thankful for your partnership.

This year the campers will be supplying Hispanic bibles to many in the church and the community of Azua. The version that is usually available in their areas is RVR 1960 version. You can easily purchase on Amazon individual bibles, or they can be purchased in bulk.

Campers can bring Hispanic bibles to donate if you would like or bring offering. Hands for hope will be passing through Ohio this August and plan to pickup bibles and take on their mission this fall to Dominican Republic and any monetary contributions will go to purchase bibles or other Christian material needed for the school and church.

Hands for Hope is a Christian ministry began serving with Raul in 2001.
